

Air Freight Security for Users of Sydney Airport

Friday 14 August 2009, 9am-noon

St George Rowers Club (Rowers on Cooks River)
1 Levey St WOLLI CREEK

The Freight and Logistics Council of NSW (FALCONSW) has engaged Intelligent Risks Pty Ltd to review the findings of the 2006 Sydney Airport Precinct Security (SAPS) Project which it undertook for the Air Freight Council of NSW. This project examined air freight security issues at Sydney Airport.

This forum will focus on:

- Improving industry/government understanding of the impact and effectiveness of Australia's regulatory framework dealing with protection of air cargo from unlawful interference.
- Improving industry/government understanding of the nature and extent of criminal activity directed at air cargo.
- Identifying key issues to focus on in consultation between industry and government with a view to maintaining a security framework that is proportionate to risk.

Target Audience

FALCONSW and Intelligent Risks are particularly keen to hear the views of air cargo terminal operators, air freight forwarders and brokers as well as air cargo managers.

Registration

There is no charge for this event.

Name: _____ Position: _____

Organisation: _____ Telephone: _____

RSVP: Close of Business, 12 August 2009

Enquiries: Hugh McMaster, Acting Executive Officer, telephone: 0412 880 861

Program

9.00am Opening Remarks, Objectives and Administration

FALCONSW

9.10am Discussion of the findings and recommendations of the 2006 SAPS report

Intelligent Risks

9.50am Part 1 of the current situation affecting users of Sydney Airport in relation to air freight security, seeking participants views on:

- Changes in the nature and extent of terrorism risks affecting air cargo – what it means to operators;
- Changes in the nature and impact of criminal risks to air cargo with specific reference to experience in Australia

Intelligent Risks

10.20am Morning Tea

10.30am Part II of the current situation affecting users of Sydney Airport in relation to air freight security, seeking participants' views on:

- Effectiveness of measures to raise security awareness and encourage reporting of crime;
- The continuing impact and effectiveness of the Regulated Air Cargo Agent programme in Australia;
- Recent and potential further Australian regulatory change affecting air cargo security requirements;
- The effectiveness of current arrangements for the physical examination of air cargo, and the outlook for introduction of new security screening technology;
- Developments in consultative arrangements between industry and the Office of Transport Security;
- The effectiveness of current frameworks in ensuring the business dynamics of air cargo are factored into regulatory policy settings;
- Issues with the potential to impact on air cargo arising from the Aviation Security Screening Review conducted by the OTS in 2008.

Intelligent Risks

11.50am Closing Remarks

FALCONSW
