Meet Graeme Samuel, AO

This is a unique opportunity to hear and meet the Chairman of the ACCC whilst supporting Alzheimer's Australia NSW in its fight against Alzheimer's disease and other forms of dementia.

Graeme will speak on: *Current issues, legislative reforms, and future challenges; Latest news from the ACCC.*

The major disease of this Century:

Today, there are over 250,000 Australians with a diagnosis of dementia, and it is Australia's 4th leading cause of death. Around 15,000 people have Younger Onset Dementia, which means they may be aged from 35 to 65 years. Dementia can affect anyone, and it is not a normal part of ageing.

Without a medical breakthrough, by 2050 there will be more than one million people with some form of dementia. Currently there is no known cure, but there is hope and we need your support to fight this insidious disease.
