

\$SAFETY

THE BOTTOM LINE

Hosted by

AUSTRALIAN LOGISTICS COUNCIL

FRIDAY 2 DECEMBER 2005 THE GRACE HOTEL, SYDNEY

The transport and logistics sector has one of the worst lost workday records in Australia. This is not acceptable. It is socially irresponsible, financially damaging and morally wrong. Moreover, it deters young people from joining the industry.

The industry is committed to increasing the level of safe working practices across the T&L sector, and in turn, improving the image of the industry.

This event is aimed at CEOs as well as OH&S practitioners to highlight the importance of good OH&S results and their positive impact on the bottom line. It is focused on gaining greater commitment and offering practical solutions to make a real difference in the workplace.

To Chief Executives, Senior Decision-Makers and those responsible for safety!

The **Breakfast Session** will cover **WHY** safety should be brought to your decision-making table; why improved safety practices have a positive impact on your bottom line; and why your organisation should commit to ALC's National Safety Strategy for Transport and Logistics.

To OH&S Practitioners!

The **Workshop** following breakfast aims to cover **HOW** safe work practices can be implemented in the workplace to reduce the cost of safety on the bottom line. Case studies from across the industry will be presented along with a practical toolkit on Positive Performance Indicators developed by the Australian Government Office of the Australian Safety and Compensation Council in the Department of Employment and Workplace Relations.

Breakfast Session: 7.30am - 9.00am. Workshop: 9.15am - 12.00pm (See registration form for attendance cost.)
