Wednesday 24 August 2005

Outline

Is the Government's rhetoric being matched by its actions?

The Government is asserting it is getting tough on corporate activity in all areas including the environment, occupational health and safety and trade practices. A range of amendments to legislation in these areas suggest that the laws are getting tougher.

Please join us for a discussion about your personal liability and the pro-active risk management strategies you should be considering.

Presenters

Who is liable and what are the consequences? – *Lea Constantine*

What are the issues around indemnification? – *Peter Armitage*

What is "due diligence" and what should you be doing to demonstrate that due diligence is being exercised? – *Patrick Ibbotson*

This session will be chaired by Elizabeth Johnstone.
