

# Trade Compliance solutions leader DIGERATI and trade automations solutions provider OZDOCS INTERNATIONAL announce an alliance promising to deliver CMR solutions for imports and exports.

**Digerati Pty Ltd and Ozdocs International Pty Ltd announce an alliance aimed at providing trade solutions to meet Australian Customs Cargo Management Legislation for Imports. The alliance provides software and services that enable importers and exporters, freight forwarders and customs agents to comply with the Cargo Management Re-engineering (CMR) requirements of Australian Customs Service.**

"Digerati and Ozdocs possess unique pool of expertise in the area of providing trade compliance and automated Electronic Data Interchange," mentioned Tony Wallbridge, General Manager, for Digerati Pty Ltd. "The alliance brings together Digerati's long standing willingness to collaborate with 3rd party application providers to provide comprehensive solutions to meet Australian Customs CMR requirements."

"Through this specific alliance, Digerati and Ozdocs products will provide a unified platform to Customs Brokers and Freight Forwarders to service their import customers with significant cost savings. The combined product offerings by Digerati and Ozdocs will automate the entire supply chain process and leverage on CMR compliance to deliver value for investments to their collective user base." Mr. Wallbridge said.

## About Digerati

Digerati is an Australian company privately held and based in Kew, Victoria. Digerati's specialty is creating software solutions that assist in maintaining international trade compliance. Established in 1996, its Tradewise product suite includes INBOUND for the Australian Customs Broking community, OUTBOUND, a complete compliance toolkit for exporters and Tradewise New Zealand, for importers and exporters in that country.

Digerati has an impressive customer list that includes all the top tier logistics and freight forwarding companies, importers, exporters and government departments. Digerati's flagship product, Inbound, is used by about 90 percent of Australian customs brokers and international trade professionals, including the Australian Customs Service. ## About Ozdocs

Ozdocs International is an Australian company privately held and based in Castle Hill, NSW. Ozdocs provides productivity tools to all parties in the trade chain for complete automation of trade data exchange. Ozdocs is one of the few software companies, which has been able to transform its products and services to respond to the technological changes over two decades.

Ozdocs International software products are used in more than 8 countries around the globe and product range extends from Electronic Data Interchange (EDI) solutions for regulatory bodies to secured exchange of document using advanced public key infrastructure (PKI) technologies.

Ozdocs is one of the few Australian software companies to offer in-built PKI technology with its CMR solutions. This capability when merged with the Ozdocs ability to integrate with back-office systems delivers to its customers the real benefits of automation their trade processes. For more details visit: [www.ozdocs.com.au](http://www.ozdocs.com.au)

Pramod Pandey, Chief Technology Officer of Ozdocs international was equally effusive with the alliance and added: "Ozdocs International's experience of delivering trade solutions globally, combined with our proven expertise in designing software to comply with regulatory bodies such as Australian Customs and AQIS places our alliance in a unique position to provide our customers with solutions needed to achieve the objective of streamlining their export and import processes with CMR compliance at the same time."

Under CMR, accurate data reporting for imports and exports is mandatory and responsibility for error free reporting has become more important than ever. To introduce their joint offering to Customs Brokers, Freight Forwarders, Importers and Exporters; Digerati and Ozdocs have committed joint resources to engage in user education through technology briefing seminars and product presentations.

Digerati and Ozdocs will be holding information sessions regarding the alliance in Sydney July 12 and Melbourne July 14. Detailed information regarding the events is available by going to the Digerati and Ozdocs website.
